

CONFIDENTIAL

5 January 1950

MEMORANDUM FOR: EXO/OSO

SUBJECT: OSO Overseas Instructor Pool

1. The following reaffirms my statements on 4 January concerning the development by OSO of a pool of instructors to be used for overseas training. From time to time TRD has been requested to provide instructors to be used in overseas positions. Up to the present time our stand has been that we do not have instructors to meet our existing requirements and are, therefore, unable to fill such requests. This situation will continue until such time as the training load of TRD is reduced, possibly the latter part of 1951.

2. The existing and future requirements of OPC in this regard are so pronounced that they are setting aside ten slots to be used as an instructor pool. It is believed advisable that a similar arrangement be made with OSO in order that recruitment may be initiated as well as to allow time for the training of such individuals. It would require approximately three to four months for security clearance and an additional three to four months to complete the necessary training. Thus, a period of from six to eight months would be required in order to prepare the individual. It is not believed advisable to wait until the demand arises, but rather to have such individuals in the organization trained and prepared for their future assignments.
